01 — MESSAGE FROM THE CEO

Technology is only as good as the results it delivers.

Photo
CEO portrait
(4:5, professional)

“Our job is to turn complex technology into simple, measurable outcomes for the people we work with.”

When we founded [Company Name] in [Year], we set out to build the kind of technology partner we had always wanted to work with: one that listens first, explains clearly, and takes ownership of the result, not just the code.

Since then, we have grown from [a small team of 5] in [City] to [120+] engineers, designers and consultants serving clients in [15] countries. We have helped [startups launch their first products], [banks modernize core systems] and [retailers scale to millions of customers].

What has not changed is how we work. We stay close to your business goals, we are honest about trade-offs, and we measure our success by yours. This profile gives an overview of who we are, what we do and how we can help. I look forward to the conversation.

[Signature]

[Full Name]

Founder & Chief Executive Officer, [Company Name]

OUR PROMISE TO EVERY CLIENT

**Clear communication**

One point of contact, weekly progress updates and no surprises.

**Quality you can rely on**

Every release is reviewed, tested and documented before it reaches you.

**Long-term commitment**

We stay with you after launch to support, maintain and improve.

02 — ABOUT US

Your long-term partner for digital growth.

[Company Name] is a [Country]-based IT services company founded in [Year]. We design, build and run software, cloud and data solutions for [startups, mid-sized companies and enterprises] across [Asia, Europe and North America].

COMPANY OVERVIEW

Legal name	[Company Legal Name Co., Ltd.]
Founded	[Year]
Headquarters	[City, Country]
Other offices	[City], [City]
Team size	[120+] full-time professionals
Core services	Software, Cloud, Data & AI, Security, Managed IT
Registration no.	[0000-00-000000]
Website	[www.yourcompany.com]

Vision

To be the most trusted technology partner for growing businesses in [region], known for work that lasts.

Mission

To help our clients solve real business problems with reliable, secure and well-crafted technology, delivered by people who care about the outcome.

OUR CORE VALUES

01

Ownership

We treat every project as our own and are accountable for the result.

02

Craft

Clean code, thoughtful design and testing are part of every delivery.

03

Transparency

Clear estimates, honest progress reports and no hidden costs.

04

Partnership

We build long-term relationships, not one-off transactions.

03 — OUR JOURNEY

Growing with our clients.

Key milestones that shaped who we are today.

[2014]

Company founded

Started in [City] with [5] engineers, building web applications for local businesses.

[2016]

First enterprise client

Delivered [a core platform for a leading bank / retailer], opening the enterprise market.

[2018]

Second office opened

Expanded to [City] to serve clients in [region]; team grew past [50].

[2020]

Certified and cloud-ready

Achieved [ISO/IEC 27001] and became a [cloud provider] partner.

[2023]

Data & AI practice launched

Dedicated team for analytics, machine learning and generative AI solutions.

[2026]

Today

[120+] professionals, [250+] projects and clients in [15] countries.

KEY NUMBERS

[10+] Years delivering software and IT services	[250+] Projects successfully delivered	[80+] Active clients worldwide
[95%] Client retention rate	[15] Countries served	[4.8/5] Average client satisfaction score

04 — SERVICES

End-to-end IT services, one accountable partner.

From the first idea to day-to-day operations, we cover the full technology lifecycle.

Custom Software Development

Scalable web, mobile and enterprise applications built around your processes.

- Web & mobile applications
- Enterprise platforms & ERP/CRM
- APIs & system integration

Cloud & DevOps

Move to the cloud safely and release faster with automated infrastructure.

- Cloud migration & architecture
- CI/CD & infrastructure as code
- Cost and performance optimization

Data & AI

Turn data into decisions with modern analytics, machine learning and AI.

- Data engineering & warehousing
- BI dashboards & reporting
- Machine learning & generative AI

Cybersecurity

Protect your systems, data and reputation with a security-first approach.

- Security assessments & audits
- Compliance readiness (ISO, SOC 2)
- Monitoring & incident response

Managed IT Services

Reliable, SLA-backed support so your team can focus on the business.

- Helpdesk & end-user support
- Network & infrastructure management
- Application maintenance & support

UI/UX & Product Design

Products people enjoy using, shaped by research and tested with real users.

- Discovery workshops & research
- Wireframes & interactive prototypes
- Design systems

Not sure where to start?

Begin with a free [2-week] technology assessment and a clear, costed roadmap.

05 — INDUSTRIES & TECHNOLOGY

Domain knowledge meets modern technology.

INDUSTRIES WE SERVE

01

Finance & Banking
Digital banking, payments, fintech platforms

02

Healthcare
Patient portals, telehealth, health data systems

03

Retail & E-commerce
Online stores, POS, inventory and loyalty

04

Logistics
Fleet tracking, warehouse and supply chain

05

Education
Learning platforms, school and campus systems

06

Manufacturing
IoT, production monitoring, ERP integration

07

Public Sector
E-government services and citizen portals

08

Media & Telecom
Streaming, billing and customer platforms

06 — HOW WE WORK

A clear process, from idea to impact.

1

Discover

Workshops with your stakeholders to understand goals, users, constraints and success metrics.

DELIVERABLES

Requirements, scope, success criteria

2

Plan

We define the architecture, team, timeline and budget, and agree how progress will be reported.

DELIVERABLES

Roadmap, estimate, project plan

3

Design

User flows, wireframes and prototypes are tested early so the right product gets built.

DELIVERABLES

UX flows, UI designs, prototype

4

Build & Test

Agile sprints with demos every two weeks, code review and automated testing built in.

DELIVERABLES

Working software each sprint, QA reports

5

Launch

Secure deployment, data migration, training and a smooth handover to your team.

DELIVERABLES

Go-live, documentation, training

6

Support & Improve

Monitoring, maintenance and continuous improvement based on real usage data.

DELIVERABLES

SLA support, monthly reports

ENGAGEMENT MODELS

Fixed Price

Agreed scope, timeline and budget, with clear milestones and acceptance criteria.

Best for: well-defined projects and MVPs

Dedicated Team

A full-time team that works as an extension of yours, managed day to day by you or us.

Best for: long-term products and scaling

Time & Materials

Flexible scope billed on actual effort, so priorities can change as you learn.

Best for: evolving requirements, R&D

07 — CASE STUDIES

Results that speak for us.

Retail & E-commerce

[Region]

[6 months]

Rebuilding an online store to handle [3×] peak traffic

CHALLENGE

[Client name or “A national fashion retailer”] had a legacy platform that slowed down during sales campaigns, causing lost orders and high support costs.

SOLUTION

We re-architected the store as cloud-native services, rebuilt checkout, and added automated scaling and monitoring on [cloud provider].

[40%]

Faster page load time

[+25%]

Online conversion rate

[99.95%]

Uptime during peak season

Technology Next.js · Node.js · Kubernetes · PostgreSQL · [AWS]

Finance & Banking

[Region]

[9 months]

Automating loan processing with data and AI

CHALLENGE

[Client name or “A regional bank”] processed loan applications manually, taking days per application and creating inconsistent decisions.

SOLUTION

We built a data pipeline and an AI-assisted review tool that extracts documents, scores risk and routes cases to the right officer.

[70%]

Less manual processing time

[4 hrs]

Average approval time, down from [3 days]

[\$1.2M]

Estimated annual savings

Technology Python · Databricks · Power BI · LLM APIs · [Azure]

10 — QUALITY & WHY CHOOSE US

Quality and security, built in from day one.

CERTIFICATIONS & MEMBERSHIPS

List only certifications your company currently holds, with the issuing body.

Quality practices

- Peer code review on every change
- Automated unit, integration and UI testing
- Dedicated QA engineers on every project
- Regular demos and client sign-off per sprint

Security & compliance

- NDAs and full IP transfer to the client
- Secure development lifecycle (OWASP)
- Role-based access and encrypted data
- Data protection aligned with [\[GDPR / APPI / local law\]](#)

WHY CHOOSE [\[COMPANY NAME\]](#)

01 Business-first thinking

We start from your goals and measure success in business outcomes.

03 Transparent delivery

Clear estimates, weekly reporting and full access to code and tools.

05 Flexible engagement

Scale the team up or down as your needs and budget change.

02 Senior, stable teams

Experienced engineers with low turnover keep knowledge in your project.

04 End-to-end capability

Strategy, design, build and support under one roof and one contract.

06 Time-zone friendly

[\[Overlap hours with your team and support in English / Japanese.\]](#)

Let's build something great together.

Tell us about your project. We will reply within [\[one business day\]](#) and can set up a free [\[30-minute\]](#) consultation.

HOW TO USE THIS TEMPLATE

Filling in your profile

PAGE	WHAT TO INCLUDE
Cover	Logo, company name, one-line positioning statement, year, main contact details.
Contents	Keep page numbers in sync if you add or remove sections. Update the four “at a glance” figures.
01 CEO message	A short, personal letter (150–250 words) and a professional portrait. Sign it.
02 About Us	Legal and registration details, vision, mission and 3–5 values you actually practice.
03 Our Journey	5–7 milestones with years. Key numbers must be accurate and easy to verify.
04 Services	Your 4–6 main service lines. Remove any you cannot deliver today.
05 Industries & Tech	Only sectors where you have references, and technologies your team supports.
06 How We Work	Adapt the steps to your real delivery method and the contract types you offer.
07 Case Studies	2–3 projects in a Challenge → Solution → Results format with real, measurable outcomes. Anonymize the client if needed.
08 Clients	Logos and testimonials only with the client's written permission.
09 Leadership	Consistent photo style (same background and crop), 1–2 line bios.
10 Quality	Current certifications with issuing body; your security and IP practices; 4–6 differentiators.
11 Contact	All offices, a direct contact person if possible, and a QR code to your booking page.

TIPS FOR A STRONG COMPANY PROFILE

- ✓ **Lead with outcomes.** Clients buy results, not technology lists.
- ✓ **Use numbers.** “Cut processing time by 70%” beats “improved efficiency”.
- ✓ **Keep it to 12–16 pages.** Put detailed pricing and proposals in separate documents.
- ✓ **Use real photos.** Your team and office build more trust than stock images.
- ✓ **Tailor per audience.** Reorder case studies to match the prospect's industry.
- ✓ **Update yearly.** Refresh figures, team and case studies at least once a year.
